Profile/Summary

I am on track to receive my Associates in Science-Engineering from Johnston Community College while dually enrolled at NC State University. I have been involved in multiple Eclipse projects using Java. I am also enrolled in a Udemy course studying Unreal Engine and C++ to develop video games. I look forward to a programming opportunity that will utilize my skills obtained in school and expose me to a workplace environment needed to grow more as a developer.

Summary of Skills

- Java
- C++
- Unreal Engine 4
- Git & GitFlow
- GitHub
- Adobe Illustrator
- Adobe Photoshop
- Microsoft Office Suite

Education

Summary of Accomplishments

- Multiple Certifications in Microsoft and Adobe Applications
- Achieved Platinum rating for ACT WorkKeys Exam

Hobbies and Interests

Naturally, I have a huge passion for video games. I love playing with my brother every day and critiquing all the small things about every game we play, such as the newest monster hunter game, or the latest update to Destiny 2. Other than video games, I love going out and playing Ultimate Frisbee with my local church group every Sunday. The thrill of being able to coordinate as a team and come up with a unique strategy to score always brings me excitement. I love hanging out with my friends and being able to talk through life after playing a good game of Ultimate. My other hobbies include playing the drums, weightlifting, and playing golf.
